

SAFETY Department
SIMHADRI

Note No :1

Ref:SMTTPP/SAFETY/2024-25/LMI/653988

Date:

07/11/2024(19:07:41)

Subject:Approval for LMI on SAFETY AWARENESS COMMUNICATIONS PROMOTION

Sub:- Approval of LMI on Safety Awareness Communication & Promotion -reg.

The LMI on Safety Awareness Communication & Promotion, Ref no: LMI-OD-OPS-SAFT-007_Rev01,

Dated: NOV - 2024 is reviewed and following changes made.

Sl No. Rev:00

Rev: 01

Annexure 2 sub-heading

Annexure 2 sub-heading typographical error corrected:

1 “The following are the intercom numbers to be implemented at all projects with such facility.”

“The following are the EMERGENCY SIREN CODES to be implemented at all stations /projects”

Clause 5.0

Clause 5.0

Site Safety Coordinator:

Site Safety Coordinator:

2 “Monthly Safety Committee meeting agenda to include incident recall by respective HOD/HOS”

“Periodic Safety Committee meeting agenda to include incident recall by respective HOD/HOS”

This Supersedes LMI-OGN-OPS-SAFT-007, Rev.00 Dated: FEB -2022.
Put up for approval of Competent authority.

TITLE	SAFETY AWARENESS COMMUNICATIONS & PROMOTION
LMI No.	LMI/OPS/SAFT/007 Rev: 01

1.0 Introduction

a.NTPC Top Management is committed to continual improvement of its safety system. One critical aspect of this commitment are that safety and health awareness is improved and promoted on a continual basis, and periodic management reviews are conducted that include safety promotion program reviews.

b.The objective of this document is to define a method to establish, maintain and review safety awareness and promotion programs. Channels of safety & health communications can include: briefings and meetings, talks, newsletters, posters, emails, messages, suggestion boxes/schemes, websites, notice boards. When developing processes for communication, the following should be considered: message complexity; the target audience and their information needs; appropriate methods and media; factors like illiteracy or language; legal requirements; and, ways to evaluate the effectiveness of the communication.

c.The reference OD does not contain elements that can vary as per location. Hence no modification or, adaptation for location is expected in this LMI.

2.0 Superseded Documents

Operation Directives "SAFETY AWARENESS COMMUNICATIONS & PROMOTION"

- f. Ensure in place an annual safety and health promotion program.
- ii. Head (O&M) or (Construction) are accountable for:
 - a. To ensure monthly safety related communication with contractors in Safety Committee Meetings.
- iii. Head of Function/Section is accountable for:
 - a. To ensure incident recall related discussion with respective function/section employees.
 - b. To ensure incident recall related discussion with respective function/section outsourced workers.
 - c. To ensure monthly safety related communication with contractors and maintain records.
 - d. Deliver pep-talk as per annual schedule, to respective section's outsourced workers. and maintain records of the same.
- iv. Area Engineers are accountable for:
 - a. To ensure task-based toolbox talks are delivered and to maintain such records.
- v. Site Safety Coordinator is accountable for:
 - a. Circulate to all employees incident related information, as and when available. Maintain records of such communication.
 - b. Prepare and circulate 1-month in advance, annual safety and health pep-talk calendar.
 - c. Ensure to include in agenda of Safety Committee Meetings: incident recall case studies, safety promotion programs, rewards by Heads of Functions/Sections.
 - d. Prepare for the HOP, an annual safety and health promotion program. Track and

TITLE	SAFETY AWARENESS COMMUNICATIONS & PROMOTION
LMI No.	LMI/OPS/SAFT/007 Rev: 01

review periodically with HOP the progress of the programs.

vi. Location HR Head is accountable for:

- a. Access control related signage and gate pass booklet are in place.
- b. Implement rewards and recognition system.

vii. Where operations and maintenance functions are outsourced:

For projects where operations and maintenance functions are outsourced to third-parties, the designated Person accountable for the performance of such a project, wherever he/she is located, shall be accountable for the above roles. In this scenario, the safety awareness, communication and promotion shall be for the location outsourcing agency as a whole and shall be included as an agenda item in every review of such project's performance.

4. 2 REQUIREMENTS

4.2.1 SAFETY POLICY AWARENESS

a. The Chairman & Managing Director (CMD) of the Company reviews the Safety Policy periodically, with the objective to clearly state the Company's policy on Occupational Health & Safety. The Policy thus laid out, serves as the foundation for the company's safety framework, systems, and guides the efforts, interventions on safety.

b. As a visual reminder of such commitment from the Top Management, the Safety Policy statement shall be displayed at some prominent places of the location like Main Gate, Visitors Lounge, office spaces/buildings (Admin, Service, Coal Bhavan, control rooms, etc.).

- Responsibility: Safety

c. All locations shall ensure that employees are aware and periodically reminded of their responsibilities/accountabilities under the Safety Policy. Signing of the safety policy shall be a part of joining process for new employees. Periodic reminders shall be in the form of written affirmation (paper, or digital) by the individual employees at a frequency of not less than one year. Occasion for such periodic awareness refresher on safety policy shall be the National Safety Day. Records of the same shall be maintained in a central repository.

- Responsibility: Safety

4.2.2 STANDARD SAFETY SIGNAGE

a. Signage is one of the simplest and widely used modes of visual communication. The purpose of safety signs is to guide human behavior and reinforce training so that hazards are avoided, people are not injured and/or equipment and the facility are not damaged. Safety signage needs to convey information like mandatory requirements, warnings, etc., in a clear, concise, easy-to-understand, language- agnostic manner using simplified pictograms. It is always a best practice to keep safety signage consistent and compliant

TITLE	SAFETY AWARENESS COMMUNICATIONS & PROMOTION
LMI No.	LMI/OPS/SAFT/007 Rev: 01

with international standards. Use of harmonized set of safety signage across the organization can make the system more efficient facilitating easier recall at the times when it matters the most.

- Responsibility: Safety

b. ISO Committee on Graphical Symbols released the ISO-7010 standard to ensure uniformity and recognizability of safety signs. Another system exclusively for chemical pictograms is the GHS - Globally Harmonized System of classification & labeling of chemicals, a UN system adopted by India. These two international systems cover all the requirements of pictograms of NTPC.

- Responsibility: All Dept

c. To limit the proliferation of safety symbols intended to convey the same meaning, all safety signage at the location shall be standardized and compliant with the ISO- 7010 and only in case of chemicals, the GHS. This standardization of safety signs shall include: mandatory action signs, warning signs, prohibition signs, safe condition/emergency equipment signs, and fire safety signs.

- Responsibility: All Dept

4.2.3 STANDARD INTERNAL EMERGENCY PHONE NUMBERS

a. The increased mobility of staff traveling within the company forces staff to unlearn & learn new intercom numbers each time they are transferred or travel. Implementing a set of standard numbers for emergency services and critical roles obviates the need of remembering different numbers depending on one's location. It facilitates easier recall and possible faster communication at the times when it matters the most.

b. The location shall implement that essential intercom phone numbers that have been standardized across the organization for critical services/roles, like: Fire, First-Aid/Ambulance, Control Room (where there is more than one control room, number of the Senior Shift in-charge), Security, HOP, GM(O&M). Annexure-1 lists the standardized intercom numbers that are to be implemented at all locations.

- Responsibility: IT

4.2.4 STANDARD EMERGENCY SIREN CODES

a. The increased mobility of staff traveling within the company forces staff to unlearn & learn new emergency siren codes each time they are transferred or travel. Internationally ILO recommends there be a standard emergency siren code. It is always a best practice to be compliant with international standards. In this context of increased mobility, it is essential to standardize emergency siren code across all locations that are required to provide such warning as per law.

TITLE	SAFETY AWARENESS COMMUNICATIONS & PROMOTION
LMI No.	LMI/OPS/SAFT/007 Rev: 01

Annexure-2 lists the standard emergency siren codes that are to be implemented at all locations.
- **Responsibility: C&I**

4.2.5 COMMUNICATION REGARDING INCIDENTS

If learning from previous incidents is not disseminated and implemented, the location would be forced to endure repeat incidents with even more agonizing results.

4.2.5.1 Employees

a. HOP directly, or through the Site Safety Coordinator shall ensure all incidents and the root causes are shared with employees. Channels for such sharing shall be daily meetings, briefings, etc. Record shall be maintained by the Site Safety Coordinator of incidents shared with employees.
- **Responsibility: Safety**

b. To reinforce learning outcomes so as to preclude a recurrence of similar incidents in the respective sections, further Incident Recall for their respective teams shall be undertaken by respective Heads of Sections, with an objective to improve job plans/task procedures/safety precautions that were deployed, but were not effective enough. This can be done as part of the respective Section's schedule of self-assessments/reviews. Records shall be maintained by the Site Safety Coordinator.

4.2.5.2 Outsourced Workers

The Incident Recall sessions for outsourced workers shall be carried out by Area Engineers /Heads of Sections, recalling the causes and corrective and preventative action taken. The incident recalled should be linked with works being undertaken in the respective area/section so as to reinforce the learning from such incident recall and to prevent repeat of similar incidents. Records shall be maintained by the respective departments.
- **Responsibility: Head of Section**

4.5.2.3 Contractors

Site Safety Coordinator shall include Incident Recall in the agenda of periodic site safety committee meetings, as part of outsourced workers and contractors' consultation and participation. Previous incidents should be included as case studies for discussion during the meeting. Such incident recall case studies should contain the facts, causes of the accident and recommended actions to prevent recurrence.

- **Responsibility: Safety**

4.2.6 COMMUNICATION WITH EMPLOYEES

This should include information:

- ☐ relating to management's commitment to the safety in the form of programs

TITLE	SAFETY AWARENESS COMMUNICATIONS & PROMOTION
LMI No.	LMI/OPS/SAFT/007 Rev: 01

undertaken and resources committed to improving safety & health performance.

- ☐ about safety & health objectives and other continual improvement activities.
- ☐ relating to safety & health related incidents – refer to 4.2.5.1 Employees above.
- ☐ relating to progress in eliminating or mitigating safety & health hazards (e.g., status reports showing progress of projects/initiatives that have been completed or are underway) and;
- ☐ relating to any changes that may impact on the safety & health aspects at the project.

A system should be in place to facilitate feedback from employees and workers. And that employees have adequate health & safety reference resources available.

Indicative Internal Communication matrix is given as Annexure-3.

4.2.7 COMMUNICATION WITH CONTRACTORS

With large numbers of works being outsourced, contractors play a big role in ensuring safety & health at the workplace. The location should maintain system for communicating health & safety requirements, including behavior, with contractors. The extent of this communication should be appropriate to the safety & health hazards and risks associated with the work to be performed. An example of such system is the Periodic Safety Committee Meeting, with a specific entry in the agenda covering this aspect. It should also be ensured that the consequences associated with nonconformity with health & safety requirements including unsafe/negligent behavior are explicitly communicated to contractors, periodically.

- Responsibility: EICs

4.2.7.1. Incidents-related Communication

Refer: 4.2.5.3 Contractors

4.2.8 COMMUNICATION WITH OUTSOURCED WORKERS

Outsourced workers or temporary agency workers from the frontline when it comes to facing work related hazards.

4.2.8.1 Location-level communication with outsourced workers

At the location level, a systematic communication program shall be in place in the form of annual schedule of pep talks on hazards with outsourced workers led by the respective HOS. Depending on the occasion the location HOP and other senior managers may join and participate in such scheduled pep talks, which shall be at least once a month. This gives the HOS and other senior managers an opportunity to directly interact with a large group of workers, at least once a month.

TITLE	SAFETY AWARENESS COMMUNICATIONS & PROMOTION
LMI No.	LMI/OPS/SAFT/007 Rev: 01

Site Safety Coordinator shall prepare such annual schedule of pep talks and arrange for circulation to all relevant HOS, as guidance. Indicative list of subjects for pep talks that can be included in such annual schedule, is given as Annexure-4.

4.2.8.2 Section-level communication related to work hazards.

At the location, respective HOSs and Area Engineers shall be accountable to ensure that all the workers in their respective sections/areas are aware about the relevant hazards before they are set-off for work. Competency needs identification and training of workers by respective Heads of Sections, shall be as per the OD/OGN on General Safety Competencies and Training.

Task-based hazard communication shall be in the form of toolbox talks (TBT). TBT shall be compulsory for all high-risk tasks such as tasks involving hot work, work in confined spaces, work at heights, work involving hazardous chemicals, rigging & lifting, material handling, excavations and demolitions. These TBTs shall be conducted by the respective Area Engineer. Records of such TBTs shall be maintained by the respective Area Engineers.

4.2.8.3 Section-level communication related to Incidents.

Refer: 4.2.5.2 Outsourced Workers

4.2.8.4 Worker Participation & Consultation

The location should have a system in place to enable workers and contractors' participation and consultation. The procedure and methods adopted should take account of applicable legal or regulatory requirements, language and literacy issues. Such system should facilitate feedback from workers and contractors. An example of such consultation is the Periodic Safety Committee Meeting, with a specific entry in the agenda covering this aspect.

4.2.9 COMMUNICATION WITH EXTERNAL INTERESTED PARTIES

a) Gaps in critical communication with external or interested parties can hurt the image of the company. To mitigate such risk, there should be designated points of contact for all such safety & health related communications at the location. The location should identify the relevant parties, which it may need to consult with, on certain safety & health matters like regulatory bodies (e.g. Dept. of Factories, Dist. Medical Officer), or emergency services (e.g. police, hospitals, fire services), those who may be affected by the Company's activities (neighborhood populace) and those who may affect the project's safety & health (nearby factories).

b) Legal and other required communication is to be identified and monitored (e.g. mandatory reports to authorities like Dept. of Factories); a system in the form of a matrix should be established to receive, document, transmit and respond to communication

TITLE	SAFETY AWARENESS COMMUNICATIONS & PROMOTION
LMI No.	LMI/OPS/SAFT/007 Rev: 01

received from external and interested parties. Indicative External Communication matrix is given as Annexure-3.

4.2.10 COMMUNICATION WITH VISITORS

- a) Visitors include delivery persons, customers, members of the public, service providers, etc. Visitors have no knowledge about the hazards of the premises and can get seriously injured, or even killed if they enter the wrong areas. A delivery person may drive his vehicle in a wrong path and his vehicle may hit an overhead electric line or get stuck on a road that is not designed for heavy vehicles. To prevent possible accidents and/or loss of productivity, visitors need specific guidelines on do's and don'ts, while within the location's premises.
- b) Access controls and escort requirements are critical to ensure safety of visitors and shall be prominently displayed in the form of signage in the common paths where such visitor movement is expected. Location Human Resources (HR) function shall ensure such display for access control.
- c) Information that should be communicated includes essential safety & health requirements; responses to emergency alarms; traffic controls; any personal protective equipment that needs to be worn. Channels for such communication to visitors at the entry to the premises, includes talks, videos, and/or a booklet that is issued along with the visitor gate pass. Location HR function shall ensure such access requirements are in place. Annexure-5 gives the standard Visitor DOs & DONTs booklet that is to be implemented at all locations.

- Responsibility - HR

4.2.11 SAFETY PROMOTION

The Objective is to continually promote health & safety awareness at the location by introducing various health & safety promotional programs including rewards and recognition. Promotion may be in various forms like publicizing relevant safety & health achievements, behavior-based safety initiatives, recognitions, holding competitions, sharing case studies, and relevant safety & health related information from reliable external publications.

4.2.11.1 Safety Promotion Programs

The location should have in place an annual safety & health promotion program for reaching all employees, outsourced workers and contractors considering options like posters, videos and/or film shows; competitions. Site safety Coordinator shall prepare an annual schedule for all safety promotional activities. Implementation shall be monitored and included in periodic reviews.

4.2.11.2 Safety Rewards & Recognition Programs

TITLE	SAFETY AWARENESS COMMUNICATIONS & PROMOTION
LMI No.	LMI/OPS/SAFT/007 Rev: 01

a. As a part of Safety promotion, a Reward and Recognition (R&R) system shall be in place to assure safety and build a safe work culture, to appreciate the right workers, contractors and employees. Recognition is present in a work environment where there is appreciation of employees' and outsourced workers' efforts, in a fair, timely, and appropriate manner. New, safer methodology and innovative ideas implemented need to be duly rewarded. Workers having consistent safety behaviour, contractors with safe work attitudes and ensuring complete safety in accomplishing assigned packages need to be duly recognized.

b. Any R&R system must be flexible enough to address changes that may occur over time and consider the makeup of the persons at the locations and situations. Thus R&R at two locations may differ significantly for the same work.

4.2.11.2.1 WHAT A SAFETY REWARDS & RECOGNITION PROGRAM IS NOT

It needs to be explicitly noted that rewards and recognition (R&R) are not a replacement for failure to effectively manage the safety and health effort. An effective R&R system helps everyone to understand that while they will be held individually accountable for at-risk practices/behavior, at the same time, rewards and recognition will always follow good safety & health performance /practices.

4.2.11.2.2 Rewards & Recognitions

a. Rewards need to be tangible so that when persons see it in their home/workplace it serves as a reminder of why they received it. The scale of reward should make people motivated to aspire for such recognition. Annual R&R budget can be decided by HoP. The amount should be lucrative and commensurate with the safety achievement of the contract worker/employee. For e.g. in a year, the average expenditure on R&R may be up to Rs. 1000/- per number of workers. It is also may be planned to giveaway the best safety performance award which may be an amount of say Rs. 10000/-, which will be visible and tangible. Other such rewards may be finalized at station/corporate level.

b. Other than the annual rewards, more frequent rewards like on-the-spot, weekly, monthly, quarterly are recommended. Such rewards might include certificates, plaques, or small items like wallets, key chains, caps, T-Shirts, or other assorted items. These are for both employees and outsourced workers. Examples for such more frequent rewards include:

c. On-the-spot rewards – **by Area Engineers, HOS, HOD – small assorted items.**

d. Monthly, in safety committee meetings the contract workmen having significant contribution to safe working culture may be rewarded by department HODs.

e. Monthly, reward and recognition to employees may be presented in ORT, PRT, Overhauling review meeting etc. **by respective HOPs / Head of O&M or Head of Construction.**

TITLE	SAFETY AWARENESS COMMUNICATIONS & PROMOTION
LMI No.	LMI/OPS/SAFT/007 Rev: 01

f. Annual – Employees & outsourced workers – Project Raising Day, **to be given by the HOP.**

g. The location HR function shall ensure R&R is implemented and integrated in case of annual rewards, in the rewarded employee's performance management ratings.

4.2.11.2.3 ENSURE CREDIBILITY OF REWARDS & RECOGNITION

a. An essential requirement for any R&R system's effectiveness is its credibility. Two possible issues can come up that can affect the credibility of any R&R program. Firstly, the R&R program should be consistent. When a program is announced and not followed-up, it leads to loss of credibility in the location's management. Partial or intermittent recognition can badly impact the safety culture of the location.

b. The second serious issue with R&R is "doing it somehow." If R&R are given for the sake of giving (for example by a rotation system, by a quota system, etc.), such practices would seriously damage the credibility of the rewards and recognitions and undermine efforts towards making workplaces safer.

c. Thus, there may be occasions where no one may qualify for the grand annual reward. Fabricating excuses and reasons for forcible fitment of annual rewards in such cases would seriously damage the safety culture of such a location.

4.2.11.3 Off-the job Safety Promotion Programs

Off-the-job health & safety promotion activities should be organized at the location periodically, to create awareness of the off-the-job safety & health hazards and the precautions to be taken. Promotion may be in the form of talks, bulletins, messages, leaflets, posters, videos.

- Responsibility: Safety

4.3 AUDIT

The audit shall be a combination of verification of system, records, implementation in the field and interviews.

System: Auditors shall validate the evidence of a system of communications and promotion, as specified under 4.2

Records: Auditors shall include verification of all the records detailed under 5.0. This shall be included as part of the audit report.

Interviews: Verify with at least five employees randomly selected from different functions on their awareness of safety policy, recent safety incidents, location safety rewards program; Verify with at least five outsourced workers randomly selected from different sections on their awareness of recent safety incidents, location safety rewards program; Verify at least five area engineers' TBT records – cross-check against PTW number for relevance; Verify at the main gate the access control requirements including access

TITLE	SAFETY AWARENESS COMMUNICATIONS & PROMOTION
LMI No.	LMI/OPS/SAFT/007 Rev: 01

control signage; Verify the rewards and recognition program of the location including actual rewards being awarded with evidence.

In a project where NTPC has outsourced operational responsibility to third parties, but continues, as the project developer, to have a legal obligation of ensuring a safe working environment, the designated person accountable for such a project shall be accountable for ensuring periodic audits. Records of such audits shall be maintained.

5.0 RECORDS TO BE MAINTAINED

Any record that is maintained as an electronic copy shall be in a format like secure PDF, that cannot be edited. Records shall be maintained as mentioned under 4.1 by respective roles.

HOP:

- Safety policy sign-off with all location employees;
- Employee feedback system;
- Internal Communication Matrix,
- External Communication Matrix;
- Location budget provisions for safety promotion activities.

HOD/HOS:

- Monthly safety assessment communication to respective contractors.
- Record of monthly pep talk attendance for respective department

Record of incident recall discussion with respective department/section employees, as part of self-assessment of department/section

Site Safety Coordinator:

- Signage conforming to ISO & GHS norms.
- Annual schedule of Pep Talks, Record: Annual Schedule of pep talks
- Annual safety promotion program.
- Incident reports circulation: record of total incidents vs circulated.
- Periodic Safety Committee meeting agenda to include incident recall by respective HOD/HOS.

TITLE	SAFETY AWARENESS COMMUNICATIONS & PROMOTION
LMI No.	LMI/OPS/SAFT/007 Rev: 01

HR:

- Access control Signage, Visitors Safety Do's & Don'ts Booklet, Record: Access control Signage & Booklet issued with visitor's gate pass.
- Implement standard Intercom numbers.

Area Engineers:

- Toolbox Talks (Task based) against PTW number and specific JSA. Record: Record of toolbox talk.

6.0 ASSOCIATED DOCUMENTS

- ANNEXURE 1 – STANDARDIZED INTERCOM NUMBERS
- ANNEXURE 2 – STANDARDIZED EMERGENCY SIREN CODES
- ANNEXURE 3 – COMMUNICATION MATRIX
- ANNEXURE 4 – ANNUAL PEP-TALK LIST
- ANNEXURE 5 – VISITOR'S DOs & DONTs BOOKLET

TITLE	SAFETY AWARENESS COMMUNICATIONS & PROMOTION
LMI No.	LMI/OPS/SAFT/007 Rev: 01

ANNEXURE 1 – STANDARDIZED INTERCOM NUMBERS

The following are the intercom numbers to be implemented at all projects with such facility.

AGENCY/SERVICE NUMBER	AGENCY/SERVICE NUMBER
Security / Main Gate	6100
Fire	6101
First-Aid/Ambulance	6102
Safety	6103
HOP	6104
Head (O&M)	6105
Control Room (where there is more than one control room, number of the Senior Shift in-charge)	6099

TITLE	SAFETY AWARENESS COMMUNICATIONS & PROMOTION
LMI No.	LMI/OPS/SAFT/007 Rev: 01

ANNEXURE 2 – STANDARDIZED EMERGENCY SIREN CODES

The following are the intercom numbers to be implemented at all projects with such facility.

EMERGENCY TYPE	SIREN CODE
Fire	10 seconds ON and 5 seconds OFF – 3 times
For Heavy Chlorine Leak	20 seconds ON and 15 seconds OFF – 3 times
Any Major Emergency that requires evacuation of work area & reach to Assembly Points	20 seconds ON and 15 seconds OFF – 5 times.
All Clear	2 minutes Continuous siren.

ANNEXURE 4 - ANNUAL PEP-TALK LIST

The following are the list of pep talks to be given by respective HOS. Other senior managers like HOP may join at their discretion.

1	Driving safety
2	Housekeeping - importance in accident & fire prevention
3	Ladder safety
4	Electrical safety
5	PPE - hands, ears, fall, etc.
6	Welding and Gas cutting
7	Power tools
8	Struck-by (or) Run-over - moving/working near heavy equipment/vehicles
9	Excavation
10	Material handling incl. Manual Handling
11	Hygiene - spitting, keeping toilets clean, etc.
12	Incident Reporting
13	Fall of objects
14	Caught-in, Caught in-between, Caught-by
15	Slips, Trips & Falls
16	Distractions & Accidents
17	Safety system & consequences of violations and unsafe behavior
18	Work on, or near water – reservoirs, ash ponds, etc.

TITLE	SAFETY AWARENESS COMMUNICATIONS & PROMOTION
LMI No.	LMI/OPS/SAFT/007 Rev: 01

ANNEXURE 5 - VISITOR'S DOs & DONTs BOOKLET
 TEMPLATE IS AVAILABLE WITH CORPORATE SAFETY FUNCTION.

SAMPLE PROVIDED BELOW IS FOR RAMAGUNDAM PROJECT

Paper Size: A5.

Fold: Tri-Fold.

Size is designed to fit in a pocket when folded with gate pass.

Project Name – given below the NTPC logo (*in the example it is Ramagundam*), is to be changed as per location.
