O&M INSTRUCTIONS TO DEAL WITH COVID 19 PANDEMIC

1.0 Objective

This LMI issues safe operating instructions to be followed for safe Operation & Maintenance of Simhadri Thermal Power Plant (SMTTP - 4x500 MW) with minimum manpower during COVID 19 pandemic. This LMI shall be implemented along with guidelines issued time to time by Govt., MOHFW, CC-HR, CC-Medical and local management guidelines. And this LMI also gives the procedures to follow for resuming the work after lockdown. This LMI shall cover all stakeholders working at NTPC Simhadri Premises.

- All Employees
- All Contract Employees and workers.
- All Trainees
- All Visitors to NTPC Simhadri Premises

2.0 SUPERSEDED DOCUMENTS & REVISION DETAILS:

Superseded: LMI/OIN/OPS/SYST/074 Issue: 1 Rev: 01 Dt : Apr'2022

Rev01: Procedure for resuming work after COVID 19 after lockdown has been included in the document

Rev02: No changes

4.0 INSTRUCTIONS FOR SAFE OPERATION OF SIMHADRI THERMAL POWER PLANT DURING COVID – 19 PANDEMIC:

4.1 GENERAL:

- 4.1.1 Don't panic. Follow the precautions and instructions given on time to time basis.
- 4.1.2 Don't believe rumors and avoid spreading the rumors.
- 4.1.3 Social/Physical distancing is the key for proper fight against COVID 19.
- 4.1.4 Frequent hand wash with soap / alcohol based sanitizer should be followed religiously by all the persons in the plant. For this, necessary hand wash facilities and sanitizers are to be provided at appropriate locations in the plant.

Responsibility- HOD (HR)/HOD (Civil)

- 4.1.5 All common locations are to be sanitized properly every four hours as per the procedure approved by local authorities/CMO/Government agencies.

Responsibility- Respective area HODs

- 4.1.6 All washrooms of common use should be sanitized every four hours and sanitizers should be provided.

Responsibility- Respective area HODs

- 4.1.7 All the Personnel's working inside the plant should not sit together and follow social distancing, preferably sitting in different locations.

Responsibility- HODs

- 4.1.8 All non-O&M functions of Stations should follow same guidelines during resumption of work after COVID-19 Lockdown.

Responsibility- HODs

- 4.1.9 All official tours and travels should be approved by not less than HOP.

Responsibility- HODs

4.2 Operations:

- 4.2.1 Control room should be manned with minimum number of desk engineers. The excess manpower in a group, after manning all locations, should be kept as standby. These people are to be brought into shift at suitable intervals and an equivalent number of people are to be made standby. A rota for duty/standby to be made including all operation executives. In case of Reserve Shut Down, similar plan to be made keeping number of running units into account.

Responsibility- HOD (Operation)

- 4.2.2 Wear nose / face masks & gloves etc. One time use disposable masks/gloves shall not be reused.

Responsibility- All employees

- 4.2.3 Social distancing may be followed as per the guidelines in seating /working arrangements.

Responsibility- All employees

- 4.2.4 Personnel from other departments except operation dept. should enter into the control room for most essential activities only.

Responsibility- HODs/SCE

- 4.2.5 All PTW hard copies and lockout keys may be collected from facility arranged outside the control room without entering into control room. Maintenance persons should enter control rooms under extreme emergencies only.

Responsibility: HOD (Maintenance)/HOD (operation)

- 4.2.6 Operating personnel should wash their hands frequently and thoroughly with sanitizer/soaps.

Responsibility- All employees

- 4.2.7 All the instructions to the local operators may be made through PA system/passed on through telephone/walkie talkie set or mobile phones.

Responsibility: SCE

- 4.2.8 Whatsapp/Microsoft Teams/other apps may be used for internal communication to the extent possible.

Responsibility: SCE

- 4.2.9 Operation engineers, shift charge engineers, unit control engineers, while going to the field for the inspection of the equipment, should make use of nose/face mask, hand gloves with PPEs.

Responsibility: SCE/Desk Engrs/UCE

- 4.2.10 Nose masks, hand gloves and PPEs should not be exchanged.

Responsibility- All employees

- 4.2.11 During unit emergencies, essential personnel should be allowed in control room, with precautions of COVID 19 and appropriate PPEs.

Responsibility: HOD (Operation)

- 4.2.12 Every desk engineer should work from one dedicated identified workstation to the extent possible without exchanging the systems.

Responsibility: UCE/SCE

- 4.2.13 All the keyboards, mouse, work stations furniture's should be sanitized frequently with alcohol based sanitizer or any appropriated method as suggested by Medical Experts/CMO/govt agencies especially before starting of the shift.

Responsibility: HOD (Operation)

- 4.2.14 While taking over the shift people should enter the control room by using sanitizers and should maintain social distancing. Charge handover briefings to be done through audio/video mode and not in person. Entry/exit pathways should be different wherever possible. If this is not possible then shift handover/takeover has to be done by following social distancing.

Responsibility: HOD (Operation)/SCE

- 4.2.15 Housekeeping staff for control rooms should wear face masks, nose masks and gloves as appropriate and complete the work and leave the premises immediately. Social distancing should be followed while carrying out housekeeping.

Responsibility: HOD (Operation)

- 4.2.16 Food for control room staff shall be supplied in packets/ personnel container from plant main canteen and food serving persons should not enter control rooms.

Responsibility: HOD (Operation)/HOD (HR)

- 4.1.17 Lifts shall be cleaned and sanitized frequently.

Responsibility: HOD (MTP)/HOD (EMD)

- 4.1.18 It is to be ensured that lifts are not crowded and ensure social distancing inside lift.

Responsibility: HOD s

4.2.19 Local authorities' instructions for isolation should strictly be followed.

Responsibility- All employees

4.2.20 No new workers (without valid pass) shall be allowed inside plant.

Responsibility- HODs

4.2.21 Any parcel/courier person should be stopped at gate. Parcel shall be collected from gate by concerned person.

Responsibility- Employees/HODs

4.2.22 All the person entering into control room shall be permitted inside only if they are with nose mask.

Responsibility- Employees/HODs/SCE

4.2.23 Mobile wash basins / arrangements for hand washing shall be provided at the entry of control room.

Responsibility: HOD (Civil-O&M)

4.2.24 Gym, tread mill and other exercise equipments to be stopped altogether.

Responsibility: HOD (Operation)

4.2.25 Common use tools and tackles (usually stored in control room) are to be sanitized frequently and as and when required before and after local operation/isolations.

Responsibility: HOD (Operation)

4.2.26 Contract Labours working at locations like coal handling, ash handling and mill reject handling should use all necessary PPEs.

Responsibility: HODs

4.2.27 Operation Desk engineers should use CCTV camera extensively for local monitoring.

Responsibility: SCE

4.2.28 Arc Suits used for electrical isolations should be sanitized properly.

Responsibility: HOD (Operation)

4.3 Sanitization during entry to common building/ individual offices-

- 4.3.1 Hand sanitizers shall be kept ready in the common building/ individual office entrances and people after entry shall sanitize their hands before proceeding to their work spots.

Responsibility: HOD (HR)/HODs

- 4.3.2 Bio-metric (Finger touch) swiping for attendance shall be temporarily discontinued. Alternate arrangements for attendance (Swiping with bar code or register) to be made.

Responsibility: HOD (HR)

4.4 Scheduled meetings:

- 4.4.1 All the stations should use the digital initiatives like video conferencing for conducting daily planning meeting.

Responsibility: HOD (TS), HOD (MTP)

- 4.4.2 In case of extreme necessary if physical meeting is required then social distancing should be strictly followed and all should wear nose masks. Minimum persons should be allowed to attend the meeting and meeting time should be restricted to half an hour.

Responsibility: HOD (TS), HOD (MTP)

- 4.4.3 Down the line communication should be effected through telephone / Whatsapp/ Microsoft Teams/ email.

Responsibility: Respective HODs

4.5 Maintenance Activities:

- 4.5.1 Preventive Maintenance works are to be done only if it is essentially needed.

Responsibility: HOD (Maintenance)

- 4.5.2 Re-schedule the maintenance work if it is not urgent.

Responsibility: HOD (Maintenance)

- 4.5.3 During carrying out maintenance activities minimum man power to be engaged and social distance should be maintained. All personnel should take precautions like wearing nose mask, goggles, gloves, frequent washing of Hands with sanitizer/soap,

etc.

Responsibility: HOD (Maintenance)

5.0 WORKFORCE REQUIREMENT AND RESTRICTIONS:

5.1.1 All O&M and Commissioning activities to be continued with requisite number of employee's mandatory for continuous and smooth running of plants.

The following is to be ensured:

- a) Listing of vital areas/equipments for operations and emergent maintenance activities that shall be functional (Operation, Chemistry, CHP, MGR, Offsite, Switchyard and other essential functions like Maintenance of Boiler, Turbine, Generator, C&I Maintenance, Electrical Maintenance, Ash Dyke maintenance etc)

Responsibility: HOD (O&M)/HODs

- b) A list of all personnel involved in the operations of these vital areas/equipments approved by BUH to be prepared and such employees to be instructed accordingly.

Responsibility: HOD (O&M)/HODs

- c) Any emergent personnel for upkeep/maintenance of these areas/equipments to be kept on call.

Responsibility: HODs

- d) Any such emergent staff required for essential services residing away from plant premises or has to commute to plant on daily basis, is to be kept in GH/transit facility near the plant.

Responsibility: HOD (HR)

5.1.2 Non-O&M and Project Construction activities

- a) BUH to identify a list of requisite staff for such functions, who shall attend office.

Responsibility: HOD (SSC)/ HOD (TS)/ HOD(HR)

5.1.3 Support functions in Plant/sites:

- a) Requisite Personnel deployed in Medical, Township electrical maintenance, Security, Canteen and other essential support functions, as identified by BUH, shall continue their duties.

Responsibility: CMO/ HOD (EM)/ HOD (HR)/ HOD (TS)**5.1.4 Outsourced Activities/Contractual Staff**

- a) Outsourcing of Operation and Maintenance activities to be optimized. Further, activities pertaining to Non-O&M, Project construction and other non-essential functions also to be tapered down.

Responsibility: HOD (O&M)/HOD(TS)/HODs/HOD(SSC)

- b) Identification of such outsourced workers and their agencies to be done for afore mentioned activities.

Responsibility: HOD (O&M)/HOD(TS)/HODs/HOD(SSC)

- c) Proper contingency arrangements may be made regarding availability of requisite contractors' workers in plant as well as townships

Responsibility: HODs/HOD (HR)**5.1.5 These manpower restrictions are to be implemented for safe operation with minimum manpower to control spreading of COVID-19 PANDEMIC.****Responsibility- HODs****5.1.6 All the executives should be available over phone at all time and constant contact with their HOD.****Responsibility: Respective HODs****5.1.7 They should continuously follow their plant activities Operation/Maintenance/ Performance/Safety/respective activities over Telephone/electronic media (E-mail / whatsapp/ Teams).****Responsibility: Respective HODs****5.1.8 If observed any difficulties/problems immediately render solution and guide them to normalize the problem through Telephone/electronic media.****Responsibility: Respective HODs****5.1.9 If the problems /emergencies are unable to solve, they need your physical presence you have to go to the plant immediately with the permission of HOD.**

Responsibility: Respective HODs

- 5.1.10 Common location equipment like PCs, telephones and other instruments should be used in extreme emergency conditions.

Responsibility: All employees

6.0 Food arrangements for all workers carrying out emergency duties in plant

- 6.1 Main plant canteen should prepare food in hygienic conditions. Sanitization of canteen, local pantries and surrounding area to be done on regular basis.

Responsibility: HOD (HR)

- 6.2 Sitting arrangement in canteen to be made in such a way that social/physical distance is maintained.

Responsibility: HOD (HR)

- 6.3 Social distance to be ensured while standing in “queue” for food ordering/payment and immediate dispersement to be done after dining.

Responsibility: HOD (HR)

- 6.4 Preferably, Instead of cash payment, electronic payment methods to be implemented.

Responsibility: HOD (HR)

7.0 NTPC Simhadri Township

7.1 Responsibilities of Residents

- 7.1.1 Employees / Residents including their family members shall avoid unnecessary movements outside and adopt stay at home concept.

8.2.2.2 To maximum possible discussions / interaction can be held through hand phones and mobile phones.

8.2.2.3 Meetings are to be avoided as far as possible and VC / Conf calls / other modes can be used in place.

8.2.2.4 All employees to strictly adhere to the social distance of minimum 1 meter.

8.2.2.5 Hard copy files should be avoided and only soft copy correspondences / approvals through E office is recommended.

8.2.2.6 To ensure that all doors / windows are in open condition always during office hours wherever possible.

8.2.2.7 As far as possible, air-conditioning shall be avoided and natural ventilation shall be used.

8.2.2.8 Sanitization of all areas before start and after end of duty hours is to be ensured.

- 8.2.2.9 Special attention to be given to wash rooms / toilets by periodical cleaning, swabbing, disinfecting and maintaining it dry.
- 8.2.2.10 Walls / Doors / Windows and all fittings in wash rooms shall also be disinfected and cleaned thoroughly.
- 8.2.2.11 Soap solutions / hand sanitizers / paper towels shall be placed and replenished periodically.
- 8.2.3 All official tours and travels should be approved by not less than Sectional heads of different corporate functions.

8.2.4 Common access places

- 8.2.4.1 Lifts shall be cleaned and sanitized frequently.

Responsibility: HOD(MTP)/HOD(EMD)

- 8.2.4.2 To ensure that Lifts are not crowded and ensure social distancing inside lift.

Responsibility: HODs

- 8.2.4.3 Hand sanitizers shall be kept in the lift always.

Responsibility: HOD(MTP)/HOD(EMD)

- 8.2.4.4 Common cooking and serving of food, tea / coffee & snacks shall be avoided.

Responsibility: HOD(HR)

- 8.2.4.5 Avoid gathering of people in veranda, balcony, parking and other common places.

Responsibility: Employees/HODs

9.0 Contingency Plan in the event of detection of Covid-19 infection

- 9.1 When a person is detected with COVID infection, the situation has to be dealt with sensitivity, humanity as well as swiftness.
- 9.2 Empathy should be shown to address the anxiety of the infected personnel.
- 9.3 Inform HR immediately about the detection to minimize any further spreading.

Responsibility: Employees/HODs

- 9.4 HR shall enquire from the personnel the various people with whom he / she was in “close contact” (person within 6 feet distance for a prolonged time, say an hour or more) in the last 15 days and note them down.

Responsibility: HOD(HR)

- 9.5 Necessary intimation about the development (detection) and requirement of quarantine to the personnel who had come in close contact with the detected person shall be done. The message (e-mail / Whatsapp) shall be as follows:

“Someone in our workplace has tested positive for Covid-19, and they have identified you as a close contact. We are here to support you. If you are at work, please prepare to leave as quickly as you can and report to the site medical Centre. Once you are at home — or if you are already working from there — find a place to self-isolate, monitor yourself for any symptoms, and talk to your doctors. How can we support you in doing all this?”

Responsibility: HOD(HR)/HODs

- 9.6 Necessary intimation shall also be given to the local administration.

Responsibility: HOD(HR)

- 9.7 Reassure the concerned employee(s) that company will be supportive.

Responsibility: HOD(HR)/HODs

- 9.8 A communication shall be sent to the rest of the employees as bellows:

Someone who tested positive on <date> is now self-isolating. The close contacts have been told and were asked to leave the workplace and self-isolate. If you were not already told you were a close contact, then you are not one. If you have questions about Covid-19 or your situation, please call your doctor and look at the MoH&FW website. The company is here to support everyone during this difficult time, and we all send our best wishes to the people affected.

Responsibility: HOD(HR)

- 9.9 HOP as well as the GM(O&M) shall check in on the employee who was tested positive for the Covid – 19 virus.

Responsibility: GM(O&M)/HOP

10.0 RESPONSIBILITIES

- 10.1 COVID 19 Core team is responsible for proper implementation of this LMI. The core team is to be formed with cross functional members from HR/P&S/TS any other department nominated by HOP and O&M representatives with a GM as head of the core team. This core team will also work extensively through phone and video conferencing and these members should contact their departments through voice and video communication and take necessary steps for implementation. The core team shall provide communication channels like whatsapp group, display of phone numbers of core team to be contacted to all the personnel working in O&M. The core team conceptually works like virtual team with communication as the back bone. This core team shall also coordinate with different O&M sections to ensure adequacy of consumables which are essential for safe operation of the plant.

Responsibility: HOP/Head of Core Team

In addition to all the instructions given in this document, the instructions given in the Annexure shall also be followed.

If any specific Govt./MOHFW/CC-HR/CC-Medical guidelines are issued pertaining to the issues notified in the above instructions, such guidelines should be followed.

10.2 Responsibilities of HR department

- 10.2.1 HR department should ensure all the persons entering the plant premises be scanned through the thermal Scan at the entry gate to screen off possible cases in every shift/general shift. In case any problem found in thermal scanner then they should be send back.
- 10.2.2 Mobile wash basins / Arrangements for hand washing shall be provided at the gate and necessary locations.
- 10.2.3 Maintaining hygienic conditions in the canteens and in dining rooms.
- 10.2.4 Biometric attendance need not be used during this covid 19 pandemic period
- 10.2.5 If any common vehicles are used or provided at plants these should be sanitized as

per the approved procedure of state authorities.

10.2.6 Persons working in plant should be provided with valid essential service pass from local administration/police/government authorities to ensure their movement from their residence to plant and from plant to residence.

10.2.7 Arrangement of adequate transport for mobilizing emergent staff from temporary residence to plant area.

10.2.8 Round the clock security arrangements, surveillance, QRT is to be made available in plant/township. No crowding of any group of employees or people in plant and township is to be allowed. If there be such a situation, appropriate action for removal of crowd to be taken with assistance of CISF/Police.

10.3 Responsibilities of Hospital/CMO/Medical Officer

10.3.1 An initial medical checkup of all personnel working inside plant premises should be done to screen off possible cases.

10.4 Responsibilities of Safety Department:

10.4.1 Ensure round the clock availability of Ambulance.

10.4.2 Ensure the availability of medicines in first-aid kits

10.4.3 Ensure distribution of adequate number of masks, gloves and PPEs.

10.4.4 Provide facilities for safe disposal of the soiled nose mask, gloves, apron etc.

11.0 REVIEW

The HOD (Operation) will be responsible for reviewing the document as and when necessary or in a period of one year.

NTPC LIMITED CORPORATE HR DEPARTMENT

Ref. No. 01/HR/CC-EDHR

Date – 25.03.2020

CIRCULAR

Sub: Implementation of guidelines during National lockdown for containment of COVID-19 Epidemic in the Country

In view of the spread of COVID-19 in various parts of the country and the recent Guidelines issued by Ministry of Home Affairs, vide Order No. 40-3/2020-DM-I(A) dated 24.03.2020 enforcing complete lock down in the country for a period of 21 days w.e.f. 25.03.2020 and in continuation to our circular dated 22.03.2020, the following guidelines may be implemented for smooth functioning of our power plants across the country, considering power generation as a critical and an essential service :

1. O&M and Commissioning- All O&M and Commissioning activities to be continued with requisite number of employee's mandatory for continuous and smooth running of plants. The following to be ensured:

- a) Listing of vital installation for operations and emergent maintenance activities that shall be functional. (Suggestive list – Operations, Chemistry, CHP, MGR, Offsite, Switchyard and other essential functions like Maintenance of Boiler, Turbine, Generator, C&I Maintenance, Electrical Maintenance, Ash Dyke maintenance etc)
- b) A list of all personnel involved in the operations of these vital installations approved by BUH to be prepared and such employees to be instructed accordingly.
- c) Any emergent personnel for upkeep/maintenance of these installations to be kept on call.
- d) Any such emergent staff required for essential services residing away from plant premises or has to commute to plant on daily basis, is to be kept in GH/transit facility near the plant.

2. Non-O&M and Project Construction activities

- a) BUH to identify a list of requisite staff for such functions, who shall attend office.

3. Support functions in Plant/sites:

- a) Requisite Personnel deployed in Medical, Township electrical maintenance, Security, Canteen and other essential support functions, as identified by BUH, shall continue their duties.

4. Office setups such as CC, Regions etc: Functions providing support services on Pan NTPC basis in such offices viz ERP, PRADIP, CC-Medical, OS control room, HR maintenance (housekeeping, water supply & AC) etc. to work with requisite staff as identified by head of unit.

NOTE for Sl. No. 1-4: Employees not identified for duty at workplace will work from home and shall be available over telephone as and when required. In emergency situations, they may be called to office.

5. Outsourcing activities/Contractual Staff:

- a) Outsourcing of Maintenance activities to be optimized. Further, activities pertaining to Non-O&M, Project construction and other non-essential functions also to be tapered-down.
- b) Identification of such outsourced workers and their agencies to be done for aforementioned activities.
- c) Proper contingency arrangements may be made regarding availability of requisite contractors' workers in plant as well as townships.

6. Township Administration:

- a) Outsourced activities w.r.t Housekeeping, water supply and electrical maintenance in township area to be planned for continued operation.
- b) All such personnel to be identified and kept under continuous check.
- c) At least one Grocery shop, one chemist shop, Bank/ATM and shop with supply of daily consumables like vegetable, fruits, milk etc to be identified and its availability may be ensured.

7. Support arrangements:

- a) All infrastructures relating to communication are essential infrastructure in such situation. Hence, adequate operation and security arrangement of same in mandatorily to be ensured.
- b) Special gate passes for ingress/outgress of workers in plant/township to be issued by site in consultation with local authorities.
- c) Round the clock security arrangements, surveillance, QRT is to be made available in plant/township. No crowding of any group of employees or people in plant and township is to be allowed. If there be such a situation, appropriate action for removal of crowd to be taken with assistance of CISF/Police.
- d) As far as possible available communication channels including social media may be used for maintaining constant communication with employees.
- e) Catering and food arrangement in plant and guest houses/transit camps to be ensured for smooth functioning.
- f) Arrangement of adequate transport for mobilizing emergent staff from temporary residence to plant area.

g) Necessary preventive measures like thermal scanning, availability of nose mask, sanitizing facilities and symptoms identification are to be done on continuous basis at all control rooms and other work places.

h) Site HR to act as a nodal department for implementation of the above and they should be in continuous touch with local authorities for any support and clearances/passes required for employees and outsourced workers for performing duty, considering power generation has been indicated in the exception list of the MHA guidelines under reference.

Action on the above may be initiated for implementation with immediate effect from 25.03.2020 to 14.04.2020 or till further notice.

This issued with the approval of Competent Authority.

SUB:	Welfare measure for contractors' workers during the outbreak of COVID-19		

In view of the recent OMs dated 23.03.2020 issued by DPE and DoE, all the agencies/associates may be advised to extend their coordination by not terminating their workers from job or reduce wages. Any leave from duty or non-operational of employment under a contract due to COVID-19 may be deemed as on duty.

Such coordinated efforts of all sections of the society will help in boosting the morale of contractors' workers to combat their fight with this epidemic.

These instructions shall apply till 30.04.2020.

This issues with the approval of competent authority.

Annexure3

3 March 2020

Getting your workplace ready for COVID-19

In January 2020 the World Health Organization (WHO) declared the outbreak of a new coronavirus disease in Hubei Province, China to be a Public Health Emergency of International Concern. WHO stated there is a high risk of the 2019 coronavirus disease (COVID-19) spreading to other countries around the world.

WHO and public health authorities around the world are taking action to contain the COVID-19 outbreak. However, long term success cannot be taken for granted. All sections of our society – including businesses and employers – must play a role if we are to stop the spread of this disease.

How COVID-19 spreads

When someone who has COVID-19 coughs or exhales they release droplets of infected fluid. Most of these droplets fall on nearby surfaces and objects – such as desks, tables or telephones. People could catch COVID-19 by touching contaminated surfaces or objects – and then touching their eyes, nose or mouth. If they are standing within one meter of a person with COVID-19 they can catch it by breathing in droplets coughed out or exhaled by them. In other words, COVID-19 spreads in a similar way to flu. Most persons infected with COVID-19 experience mild symptoms and recover. However, some go on to experience more serious illness and may require hospital care. Risk of serious illness rises with age: people over 40 seem to be more vulnerable than those under 40. People with weakened immune systems and people with conditions such as diabetes, heart and lung disease are also more vulnerable to serious illness.

This document gives advice on:

1. Simple ways to prevent the spread of COVID-19 in your workplace
2. How to manage COVID-19 risks when organizing meetings & events
3. Things to consider when you and your employees travel
4. Getting your workplace ready in case COVID-19 arrives in your community

1. Simple ways to prevent the spread of COVID-19 in your workplace

The low-cost measures below will help prevent the spread of infections in your workplace, such as colds, flu and stomach bugs, and protect your customers, contractors and employees.

Employers should start doing these things now, even if COVID-19 has not arrived in the communities where they operate. They can already reduce working days lost due to illness and stop or slow the spread of COVID-19 if it arrives at one of your workplaces.

- Make sure your workplaces are clean and hygienic

- Surfaces (e.g. desks and tables) and objects (e.g. telephones, keyboards) need to be wiped with disinfectant regularly
- Why? Because contamination on surfaces touched by employees and customers is one of the main ways that COVID-19 spreads
- Promote regular and thorough hand-washing by employees, contractors and customers
 - Put sanitizing hand rub dispensers in prominent places around the workplace. Make sure these dispensers are regularly refilled
 - Display posters promoting hand-washing – ask your local public health authority for these or look on www.WHO.int.
 - Combine this with other communication measures such as offering guidance from occupational health and safety officers, briefings at meetings and information on the intranet to promote hand-washing
 - Make sure that staff, contractors and customers have access to places where they can wash their hands with soap and water
 - Why? Because washing kills the virus on your hands and prevents the spread of COVID-19
- Promote good respiratory hygiene in the workplace
 - Display posters promoting respiratory hygiene. Combine this with other communication measures such as offering guidance from occupational health and safety officers, briefing at meetings and information on the intranet etc.
 - Ensure that face masks¹ and / or paper tissues are available at your workplaces, for those who develop a runny nose or cough at work, along with closed bins for hygienically disposing of them
 - Why? Because good respiratory hygiene prevents the spread of COVID-19
- Advise employees and contractors to consult national travel advice before going on business trips.
- Brief your employees, contractors and customers that if COVID-19 starts spreading in your community anyone with even a mild cough or low-grade fever (37.3 C or more) needs to stay at home. They should also stay home (or work from home) if they have had to take simple

¹ Ordinary surgical face masks rather than N95 face masks

medications, such as paracetamol/acetaminophen, ibuprofen or aspirin, which may mask symptoms of infection

- Keep communicating and promoting the message that people need to stay at home even if they have just mild symptoms of COVID-19.
- Display posters with this message in your workplaces. Combine this with other communication channels commonly used in your organization or business.
- Your occupational health services, local public health authority or other partners may have developed campaign materials to promote this message
- Make clear to employees that they will be able to count this time off as sick leave.

2. How to manage COVID-19 risk when organizing meetings & events

Why do employers and organizers need to think about COVID-19?

Organizers of meetings and events need to think about the potential risk from COVID-19 because:

- There is a risk that people attending your meeting or event might be unwittingly bringing the COVID-19 virus to the meeting. Others might be unknowingly exposed to COVID-19.
- While COVID-19 is a mild disease for most people, it can make some very ill. Around 1 in every 5 people who catch COVID-19 needs hospital treatment.

Key considerations to prevent or reduce COVID-19 risks

BEFORE the meeting or event

- Check the advice from the authorities in the community where you plan to hold the meeting or event. Follow their advice.
- Develop and agree a preparedness plan to prevent infection at your meeting or event.
 - Consider whether a face-to-face meeting or event is needed. Could it be replaced by a teleconference or online event?
 - Could the meeting or event be scaled down so that fewer people attend?
 - Ensure and verify information and communication channels in advance with key partners such as public health and health care authorities.

- Pre-order sufficient supplies and materials, including tissues and hand sanitizer for all participants. Have surgical masks available to offer anyone who develops respiratory symptoms.
- Actively monitor where COVID-19 is circulating. Advise participants in advance that if they have any symptoms or feel unwell, they should not attend.
- Make sure all organizers, participants, caterers and visitors at the event provide contact details: mobile telephone number, email and address where they are staying. State clearly that their details will be shared with local public health authorities if any participant becomes ill with a suspected infectious disease. If they will not agree to this they cannot attend the event or meeting.
- Develop and agree a response plan in case someone at the meeting becomes ill with symptoms of COVID-19 (dry cough, fever, malaise). This plan should include at least:
 - Identify a room or area where someone who is feeling unwell or has symptoms can be safely isolated
 - Have a plan for how they can be safely transferred from there to a health facility.
 - Know what to do if a meeting participant, staff member or service provider tests positive for COVID-19 during or just after the meeting
 - Agree the plan in advance with your partner healthcare provider or health department.

DURING the meeting or event

- Provide information or a briefing, preferably both orally and in writing, on COVID-19 and the measures that organizers are taking to make this event safe for participants.
 - Build trust. For example, as an icebreaker, practice ways to say hello without touching.
 - Encourage regular hand-washing or use of an alcohol rub by all participants at the meeting or event
 - Encourage participants to cover their face with the bend of their elbow or a tissue if they cough or sneeze. Supply tissues and closed bins to dispose of them in.
 - Provide contact details or a health hotline number that participants can call for advice or to give information.
- Display dispensers of alcohol-based hand rub prominently around the venue.
- If there is space, arrange seats so that participants are at least one meter apart.

- Open windows and doors whenever possible to make sure the venue is well ventilated.
- If anyone who starts to feel unwell, follow your preparedness plan or call your hotline.
 - Depending on the situation in your area, or recent travel of the participant, place the person in the isolation room. Offer the person a mask so they can get home safely, if appropriate, or to a designated assessment facility.
- Thank all participants for their cooperation with the provisions in place.

AFTER the meeting

1. Retain the names and contact details of all participants for at least one month. This will help public health authorities trace people who may have been exposed to COVID-19 if one or more participants become ill shortly after the event.
2. If someone at the meeting or event was isolated as a suspected COVID-19 case, the organizer should let all participants know this. They should be advised to monitor themselves for symptoms for 14 days and take their temperature twice a day.
3. If they develop even a mild cough or low-grade fever (i.e. a temperature of 37.3 C or more) they should stay at home and self-isolate. This means avoiding close contact (1 meter or nearer) with other people, including family members. They should also telephone their healthcare provider or the local public health department, giving them details of their recent travel and symptoms.
4. Thank all the participants for their cooperation with the provisions in place.

3. Things to consider when you and your employees travel

- **Before traveling**

- Make sure your organization and its employees have the latest information on areas where COVID-19 is spreading. You can find this at <https://www.who.int/emergencies/diseases/novel-coronavirus-2019/situation-reports/>
- Based on the latest information, your organization should assess the benefits and risks related to upcoming travel plans.
- Avoid sending employees who may be at higher risk of serious illness (e.g. older employees and those with medical conditions such as diabetes, heart and lung disease) to areas where COVID-19 is spreading.
- Make sure all persons travelling to locations reporting COVID-19 are briefed by a qualified professional (e.g. staff health services, health care provider or local public health partner)
- Consider issuing employees who are about to travel with small bottles (under 100 CL) of alcohol-based hand rub. This can facilitate regular hand-washing.

- **While traveling:**

- Encourage employees to wash their hands regularly and stay at least one meter away from people who are coughing or sneezing
- Ensure employees know what to do and who to contact if they feel ill while traveling.
- Ensure that your employees comply with instructions from local authorities where they are traveling. If, for example, they are told by local authorities not to go somewhere they should comply with this. Your employees should comply with any local restrictions on travel, movement or large gatherings.

- **When you or your employees return from traveling:**

- Employees who have returned from an area where COVID-19 is spreading should monitor themselves for symptoms for 14 days and take their temperature twice a day.
- If they develop even a mild cough or low grade fever (i.e. a temperature of 37.3 C or more) they should stay at home and self-isolate. This means avoiding close contact (one meter or nearer) with other people, including family members. They should also telephone their

healthcare provider or the local public health department, giving them details of their recent travel and symptoms.

4. Getting your workplace ready in case COVID-19 arrives in your community

- Develop a plan of what to do if someone becomes ill with suspected COVID-19 at one of your workplaces
 - The plan should cover putting the ill person in a room or area where they are isolated from others in the workplace, limiting the number of people who have contact with the sick person and contacting the local health authorities.
 - Consider how to identify persons who may be at risk, and support them, without inviting stigma and discrimination into your workplace. This could include persons who have recently travelled to an area reporting cases, or other personnel who have conditions that put them at higher risk of serious illness (e.g. diabetes, heart and lung disease, older age).
 - Tell your local public health authority you are developing the plan and seek their input.
- Promote regular teleworking across your organization. If there is an outbreak of COVID-19 in your community the health authorities may advise people to avoid public transport and crowded places. Teleworking will help your business keep operating while your employees stay safe.
- Develop a contingency and business continuity plan for an outbreak in the communities where your business operates
 - The plan will help prepare your organization for the possibility of an outbreak of COVID-19 in its workplaces or community. It may also be valid for other health emergencies
 - The plan should address how to keep your business running even if a significant number of employees, contractors and suppliers cannot come to your place of business - either due to local restrictions on travel or because they are ill.
 - Communicate to your employees and contractors about the plan and make sure they are aware of what they need to do – or not do – under the plan. Emphasize key points such as the importance of staying away from work even if they have only mild symptoms or have had to take simple medications (e.g. paracetamol, ibuprofen) which may mask the symptoms
 - Be sure your plan addresses the mental health and social consequences of a case of COVID-19 in the workplace or in the community and offer information and support.

- For small and medium-sized businesses without in-house staff health and welfare support, develop partnerships and plans with your local health and social service providers in advance of any emergency.
- Your local or national public health authority may be able to offer support and guidance in developing your plan.

Remember:

Now is the time to prepare for COVID-19. Simple precautions and planning can make a big difference. Action now will help protect your employees and your business.
